CLIENT CASE STUDY · POWER TRANSMISSION · HR

EXECUTIVE TALENT REVIEW · BUILT BY HR WITH GENAI PROMPTING

Executive Talent Tracker

The HR team learned to prompt GenAI into building their own tool: one scorecard per leader with rating history, retention risk, readiness and successors, exported straight into the review pack.

~~3 wk~~ → **2** days to prepare the talent review pack

2 days
Talent review pack preparation
▼ vs ~3 weeks of collation

30 + fields
Data fields on every scorecard
profile to successors, one page

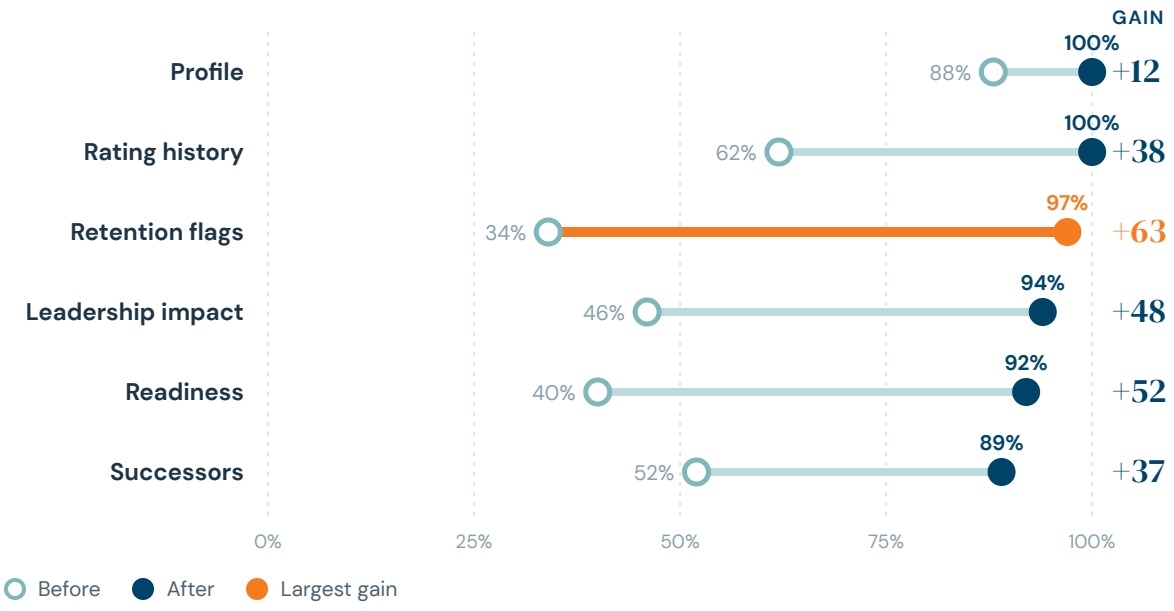

3 formats
Export formats, single or bulk
PDF · PPT · Excel

89 %
Leaders with a named successor
visible in every review

Rings: 2 days against the ~3-week collation (inner ring); the seven field groups behind the 30+ fields; one segment per export format; share of leaders with a named successor.

01 Every leader arrives with a complete page

% of leaders with each field group ready for review · before vs after

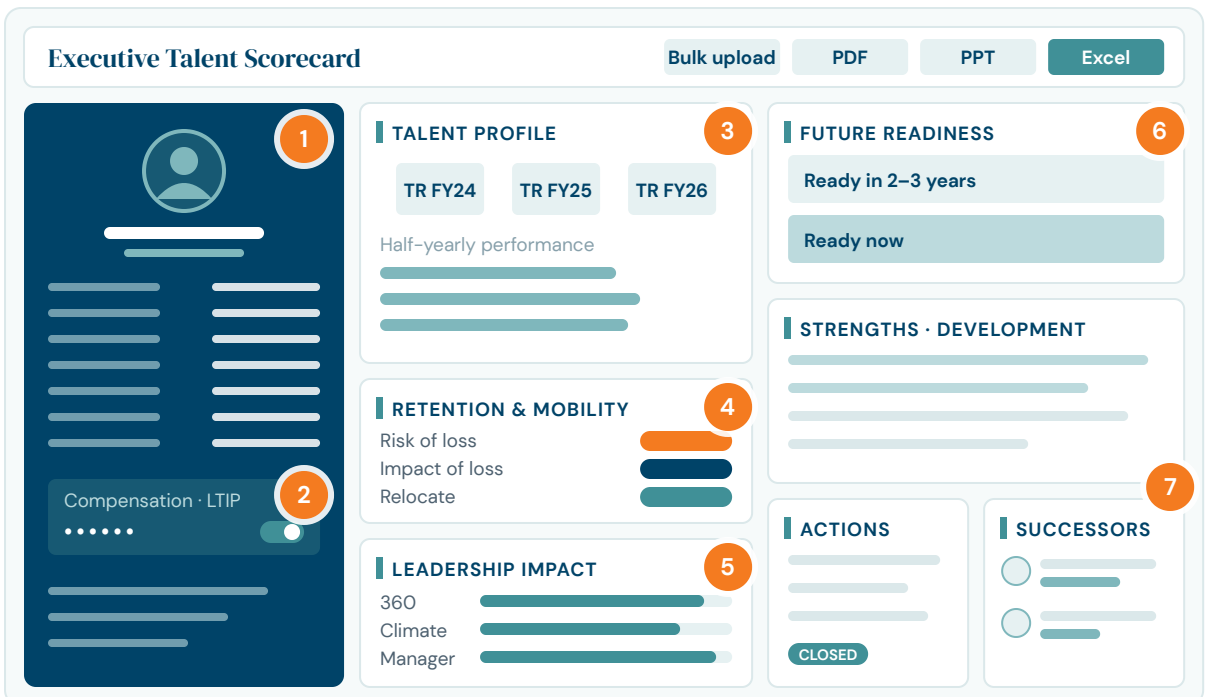

BIGGEST SHIFT
Retention risk: 34% → 97%
Risk of loss, impact of loss and mobility used to be raised verbally in the meeting. Now they are flagged on the page beforehand.

HISTORY ON ONE CARD
Rating history: 62% → 100%
TR rating FY24–FY26 and half-yearly performance, no longer stitched together by hand for each leader.

CONFIDENTIAL BY DESIGN
Masking toggles
Compensation and LTIP sit behind toggles, so the same scorecard is safe in wider forums.

02 One page per leader, 30+ fields

Layout of the scorecard HR built · schematic, no employee data

1. **Profile**: business unit, grade, manager, location, tenure in role and organisation, total experience, function
2. **Reward**: compensation by FY and unvested LTIP behind masking toggles; last promotion date
3. **Talent profile**: TR rating FY24–FY26, previous-cycle top talent, half-yearly performance history
4. **Retention & mobility**: risk of loss, impact of loss, willing to relocate
5. **Leadership impact**: 360 assessment, manager climate and manager scores, with trends
6. **Readiness**: roles ready now and in 2–3 years; core strengths and development areas
7. **Succession & actions**: potential successors with readiness; actions taken and proposed

Bulk or single upload in; bulk or selected export to PDF, selected PPT and Excel out.

03 The review pool at a glance

From the working replica · synthetic pool of 36 leaders, names fictional

FY25 review
9-box, 36 leaders

Two review cycles side by side. Toggling FY25 → FY26 shows leaders moving: 14 of the 36 change box between cycles.

FY26 review
Same pool, next cycle

Star box outlined. Performance uses half-yearly results; potential uses the TR rating for that cycle.

Retention risk matrix
Leaders by risk × impact of loss

Act first: 4 leaders are high risk and high impact of loss, visible before the meeting rather than discovered in it.

04 Four pain points, four fixes

Before → after

BEFORE
Data in many places
Ratings, 360 scores, compensation, LTIP and succession sat in different files owned by different teams.

ONE EXTRACT

AFTER
Bulk-uploaded
One extract, bulk-uploaded for all leaders; next cycle refreshed by re-uploading it.

BEFORE
History hard to see
Rating trends across FY24–FY26 and half-year performance stitched together for each leader.

SCORING RULES

AFTER
Trends on one card
TR rating FY24–FY26 and half-yearly performance side by side, with 360 and climate trends.

BEFORE
Risk flagged too late
Risk of loss, impact of loss and mobility discussed in the room, not visible on the page.

COLOURED FLAGS

AFTER
Risk on the page
Risk of loss, impact of loss and mobility flagged before the meeting.

BEFORE
Slides by hand
Each cycle meant rebuilding one-pagers in PowerPoint and re-checking every number.

BULK EXPORT

AFTER
Pack in one click
Bulk or selected export to PDF, PPT and Excel; confidential fields masked, not deleted.

05 The pattern HR learned

Reused for new HR trackers, without waiting for IT

- **Fields** — One field dictionary for every leader
- **Score** — TR rating, performance, 360 trends
- **Flag** — Risk, impact, relocation as coloured flags
- **Layout** — One page: profile panel + review blocks
- **Export** — Bulk in; PDF, PPT and Excel out

06 Review pack prep

Time to prepare one talent review cycle · indicative

Before · collation from scattered sheets

~3 wk

After · one extract, bulk-generated

2 days

Each tick ≈ one working day · indicative

3 wk → 2 d talent review pack preparation

Packs exported straight to PPT and PDF.

07 How HMC ran it

1 week	**Discover**	Listed leadership's questions per executive; mapped HRMS, rating, 360 and succession sources.
1 week	**Design**	HR wrote the field dictionary, scoring rules and flags in plain language.
2 weeks	**Build**	In hands-on workshops, HR prompted the scorecard, upload and export into existence.
1 cycle	**Adopt**	Ran the 2025–26 talent review on it; packs exported to PPT and PDF.
∞ ongoing	**Scale**	Reusable tool-building playbook; HR owns changes.

What transfers to any HR team

01 — Teach the pattern, not the tool
Fields, Score, Flag, Layout, Export. Once HR knew the steps, they could prompt new tools without waiting for IT.

02 — Design for the review conversation
Start from what leadership asks about each executive. The page layout follows those questions.

03 — Build confidentiality in from day one
Masking toggles for compensation and LTIP made the same scorecard safe to use in wider forums.

Built with **GenAI prompting** · **Claude** · **Excel** · **HTML scorecard** · **PDF & PPT export** | Prepared by Havish M Consulting · All numbers and figures are indicative and synthetic to maintain client confidentiality.
