AFFORDABLE HOME LOANS · UNDERWRITING · GENAI CO-PILOT

Credit Appraisal Co-pilot

A GenAI co-pilot reads the whole loan file, from twelve months of bank statements to the legal and technical reports, and drafts the credit appraisal memo. The underwriter still decides, in minutes instead of hours.

~~3.5h~~ → **40** minutes to review and sign a credit memo

~40 min
Time to draft a credit memo
▼ from about 3.5 hours

−30 %
Files sent back to branch
▼ missing items caught day one

2 ×
Files per underwriter per day
▲ same team, double capacity

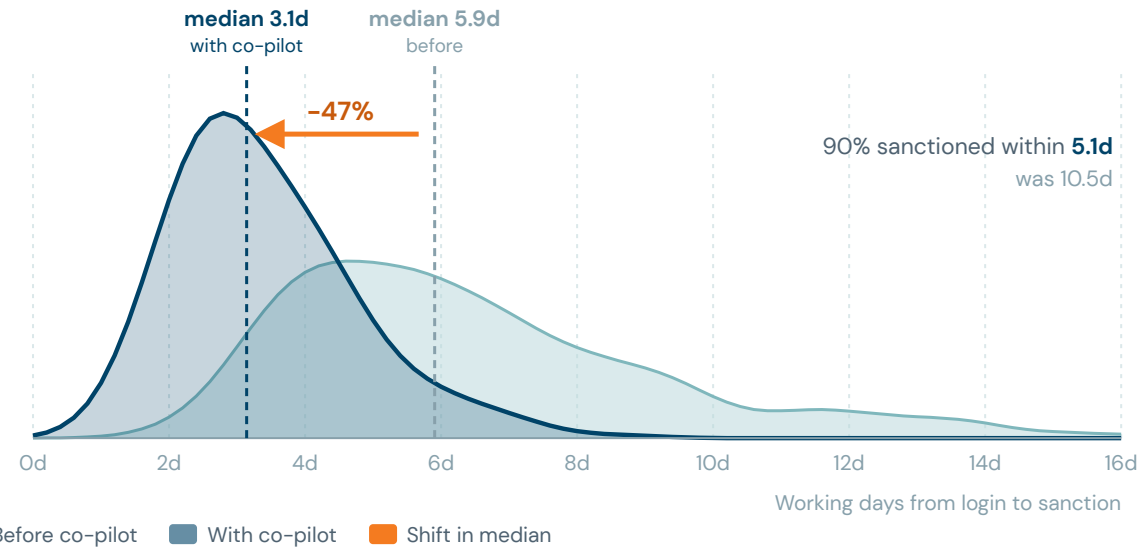

100 %
Bank statements fully analysed
▲ every transaction, every month

Rings: 40 of 210 minutes, with the full 3.5 h inside; files sent back per 100 (29 with co-pilot, 42 before inside); capacity doubled; one segment per statement month, all twelve read. Figures indicative.

02 AI reads and drafts. The underwriter decides.

What the co-pilot does with one loan file

THE LOAN FILE

- Bank statements — 6 to 12 months, ~400 transactions
- ITRs and payslips — or platform payout statements
- Bureau report — obligations and enquiries
- Legal report — title and chain
- Technical valuation — site visit
- KYC — plus shop licence or vehicle RC

1 Read the file — Every page
Statements, ITRs, payslips, bureau, legal and technical reports, OCR'd and parsed.
CLAUDE + OCR

2 Classify transactions — 12 months
Salary, business receipts, cash deposits, EMIs, bounces, spends: every line sorted.
CLAUDE

3 Assess income — By profile
The policy method for salaried, trader or transport operator, shown step by step.
RULE ENGINE

4 Check eligibility — FOIR · LTV
Live against policy, with obligation exclusions and the maximum eligible loan.
RULE ENGINE

5 Flag and draft — Draft CAM
Red flags plus the memo in the existing CAM format, and a branch checklist on day one.
CLAUDE

HUMAN IN CHARGE
Underwriter reviews and signs
Credit managers approve from the same memo. Nothing changes in the format approvers already know.

Every number in the memo links back to the page it came from.

● **Claude** does the reading and drafting ● **Deterministic rules** do the maths ● The co-pilot works inside the lender's own credit policy

03 Three borrower profiles, one policy rulebook

From the page's worked examples · illustrative applicants

SALARIED
IT support executive

Income method	Net salary, average of last 6 months
FOIR cap	55% of income
File	14 statement pages · 6 payslips · Form 16

CLEAR — Salary on the 1st every month, matching payslips
Bank statement · payslips

CHECK — Bureau enquiry with no account opened: confirm with applicant
Bureau report p.3

CHECK — Approved building plan missing: added to branch checklist
Legal report p.6

SELF-EMPLOYED · TRADER
Kirana store owner

Income method	Banking turnover × 15% trade margin, 12-month average
FOIR cap	50% of income
File	22 statement pages · 2 years ITR

HIGH — Cash deposits above the 30% comfort level: verify stock register, supplier bills
Bank statement pp.2–22

CHECK — One gold-loan EMI bounced, cleared in 3 days
Bank statement p.13 · Bureau p.2

CLEAR — ITR income in line with banking-assessed income
ITR p.1

SELF-EMPLOYED · TRANSPORT
Cab driver-owner

Income method	Aggregator payouts × 55% after fuel and running costs
FOIR cap	50% of income
File	18 statement pages · payout summary

HIGH — Two vehicle-loan EMIs bounced; both repaid within a week
Bank statement pp.4, 13 · Bureau p.2

CHECK — Vehicle loan has 5 EMIs left: can be excluded from FOIR with closure proof
Bureau report p.2

CHECK — Payouts dip ~20% in monsoon: income on 12-month average
Bank statement pp.15–18

POLICY AS THE PROMPT
The rule-pack signed off by Credit

- Income assessment method per profile: salaried, trader, transport operator
- FOIR and LTV limits, obligation-exclusion rules and deviation triggers
- The existing CAM format, section by section
- Standard red-flag checks, each linked to its source page

Applicants, transactions and policy limits on this panel are illustrative and do not represent any real customer.

04 Four pain points, four fixes

Before → after

BEFORE
Hours per file
6 to 12 months of statements, ITRs, payslips and property papers read, then the memo typed.
DRAFT THE MEMO
AFTER
Drafted in minutes
Reviewed and signed in about 40 minutes, from a CAM in the existing format.

BEFORE
Inconsistent income calls
Two underwriters could assess the same kirana owner differently; cash handled case by case.
POLICY PER PROFILE
AFTER
One method per profile
Policy income method applied and shown step by step, every time.

BEFORE
Back-and-forth with branches
Missing documents surfaced at credit review; files went back, sometimes twice.
DAY-ONE CHECKLIST
AFTER
Asked for early
Branch checklist raised on day one, so missing papers come in before review.

BEFORE
Red flags hidden in volume
A bounced EMI or round-figure cash deposits easy to miss among 400 transactions.
STANDARD CHECKS
AFTER
Flags with sources
Every transaction classified; each flag linked to the page behind it.

05 Time per memo

Where the 3.5 hours went, and what is left · indicative

Before · typed from scratch
≈ ⅔ reading & re-typing | judgement
about 3.5 hours per file

After · drafted by the co-pilot
drafted in minutes; reviewed and signed in ~40

3.5 h → ~40 min
per credit appraisal memo · indicative

06 Capacity and coverage

Same underwriting team · indicative

Files per underwriter per day
Before 1×
With co-pilot 2×
same team, double the capacity

Bank-statement months read in full
Before: O N D J F M A M J J A S
After: O N D J F M A M J J A S
Before: sampled by eye · After: every transaction, 12 of 12

07 How HMC ran it

- **2 weeks — Discover**: Shadowed underwriters in regional hubs; time-and-motion study and file-rework map.
- **2 weeks — Design**: Credit policy turned into a rule-pack and CAM template, signed off by Credit.
- **4 weeks — Build**: Read, classify, assess, draft, in a controlled environment with an audit trail.
- **6 weeks — Adopt**: Four weeks of side-by-side memos, differences reviewed each Friday.
- **∞ ongoing — Scale**: More hubs; extending to loan against property and balance transfers.

What transfers to any credit team

01 — Let AI read, let people judge
The biggest time sink was reading and typing, not deciding. Take that away and underwriters spend their time on the judgement calls.

02 — Policy is the prompt
Encoding the credit policy as rules made the co-pilot consistent, explainable and easy for risk to sign off.

03 — Every number needs a source
Linking each figure and flag to its page is what earned the trust of approvers and auditors.
