Every Leaver, Heard

An AI voice interviewer talks to every leaver, asks five questions that adapt to each answer, and turns the conversation into a coded exit record and an attrition dashboard HR can act on the next day.

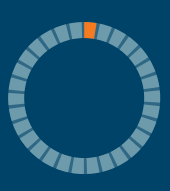

~~35%~~ → **92%** of leavers complete an exit interview

92 %
Leavers completing an exit interview
▲ from about 35%

85 %
Exits with a specific, actionable reason
▲ from about 20%

1 day
From last day to insight with the HRBP
▼ from about 30 days

18 % lower
Regrettable attrition in pilot zones
▼ acting on what leavers said

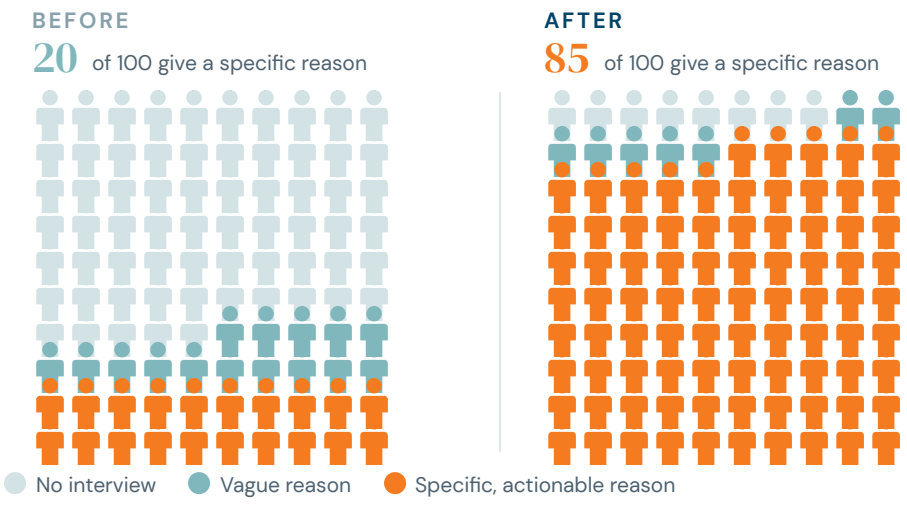

Rings: share now, with the earlier level inside (completion, specific reasons); one day out of the old ~30; reduction in regrettable attrition. Figures indicative; validated metrics available on request.

01 More leavers heard, and heard sooner

Impact charts from the case study · indicative

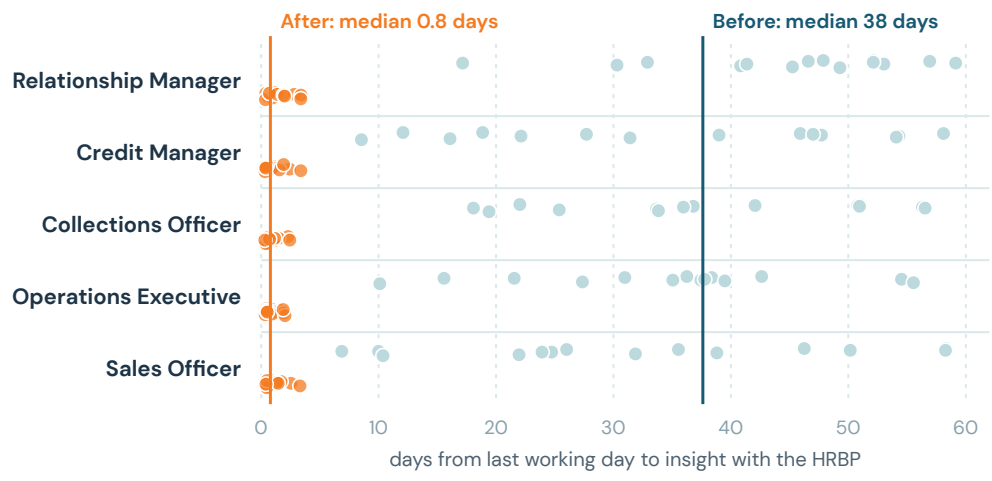

What HR learns from 100 leavers

One figure per leaver

Days from last day to insight, by role

One dot per exit · before (light) and after (orange)

02 Five questions, each shaped by the last answer

Sample interview with a synthetic leaver profile, as shown on the page

SYNTHETIC LEAVER — **Relationship Manager, Home Loans** · West zone · 3 years 2 months · rated "exceeds" two years running

1 OPEN QUESTION, NO ASSUMPTIONS
"To start, what made you decide to leave?"
"It's the targets. Every month the disbursement target goes up… so I'm working weekends and earning less."

2 FOLLOWING UP ON TARGETS AND INCENTIVES RAISED
"You said 'it's the targets'. How have your targets changed since you joined, and was the change explained to you?"
"When I joined, my target was around four crore a month. Now it's close to seven, with the same leads."

3 GETTING SPECIFICS ON WORKLOAD
"You said 'I'm working weekends'. What does a typical week look like for you right now?"
"My manager is supportive, but he gets the same pressure from the zone."

4 FINDING THE RETENTION LEVER
"If you could change one thing about incentives & targets, what would have made you stay?"
"If the incentive slab had been fair and I had a path to team lead, I would have stayed."

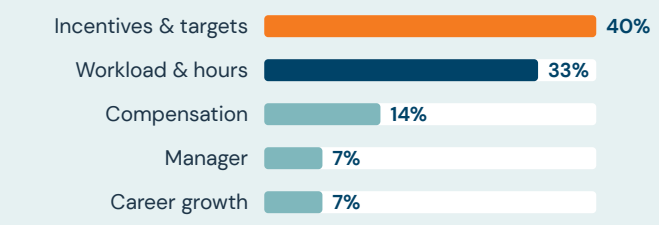

5 CLOSING: WOULD THEY RETURN OR RECOMMEND
"Would you consider coming back someday, and would you recommend it to a friend?"
"Yes, I would consider coming back in a couple of years if the incentive scheme is fixed."

GENERATED AFTER THE FIFTH ANSWER

The conversation, coded for HR

Primary category	Incentives & targets
Also	Workload & hours · Compensation
Regrettable	Yes · strong ratings, experienced
Would return	Yes
Would recommend	8 / 10

REASON WEIGHTS

HR action: review target-setting and incentive slabs with field input; flag as regrettable and check for similar risk in the same team.

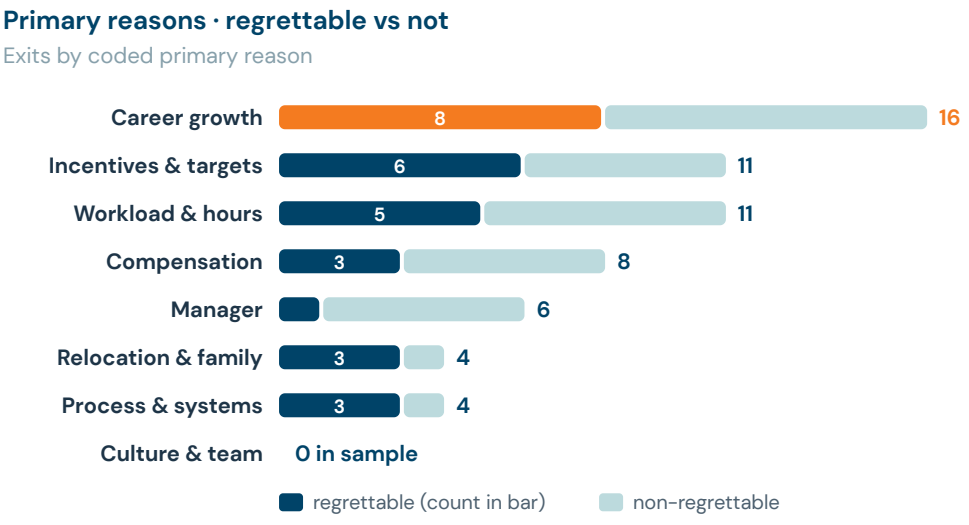

03 What sixty pilot interviews say

Synthetic pilot sample from the page's attrition insights dashboard · all zones, all roles

INTERVIEWS	REGRETTABLE EXITS	TOP REASON	LEAVER ENPS
60 pilot sample	48% 29 of 60	Career growth 16 of 60	−25 would recommend as employer

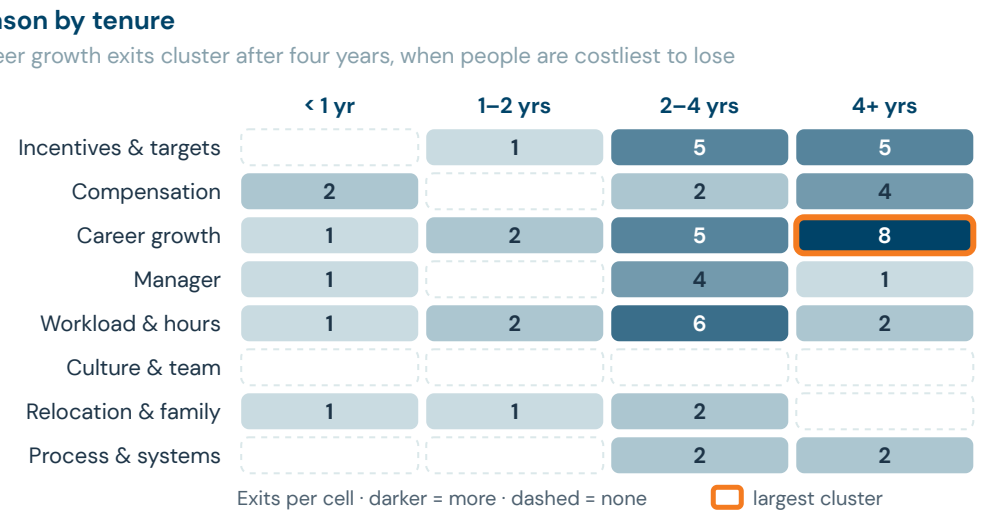

Primary reasons · regrettable vs not

Exits by coded primary reason

Reason by tenure

Career growth exits cluster after four years, when people are costliest to lose

04 Four pain points, four fixes

Before → after

BEFORE	AFTER
Too few interviews HRBPs covered many branches; most leavers left without a conversation.	VOICE, ANY TIME **Almost every leaver** Invited in their last week; optional, private and under 10 minutes.
Same script for everyone Fixed forms got fixed answers: "better opportunity", "personal reasons".	FIVE DYNAMIC QUESTIONS **Follows the answer** One open question, then four that follow what the leaver just said.
Not comfortable with the manager Leavers held back when the person asking was close to the reason.	NEUTRAL AI VOICE **Honest, with guardrails** Reviewed by HR; sensitive issues flagged with a confidential route.
Insight arrived late Notes sat in files for weeks; patterns by branch or manager were never seen.	CODED RECORD + DASHBOARD **Next day, by segment** Coded reasons, regrettable flag, quotes and actions by zone, role and tenure.

05 How exit interviews work now

	BEFORE	AFTER
Coverage	About a third of leavers	Almost every leaver, any time
Questions	Same form for everyone	Five, each shaped by the last answer
Who asks	Often the manager	A neutral AI voice, reviewed by HR
Output	Free-text notes	Coded reasons, regrettable flag, quotes, actions
Sensitive issues	Rarely raised	Flagged with a confidential route
Insight	Weeks later, if at all	Next day, by zone, role and tenure

06 How HMC ran it

2 weeks	**Discover** Reasons taxonomy from two years of exit data. **Playbook and reason codes.**
2 weeks	**Design** Five dynamic questions; no pressure to stay. **Prompt and guardrails.**
4 weeks	**Build** Voice, speech-to-text, GenAI coding, dashboard. **Working interviewer.**
Pilot zones	**Adopt** With consent; HRBPs review every record. **Pilot results, HR process.**
All zones	**Scale** All roles; same engine for stay interviews. **Roll-out plan.**

What any HR team can borrow

01 — Follow the answer, not the form
The second question matters most. Asking about what the person just said is what gets past "personal reasons".

02 — Neutral, short and optional
Five questions in under ten minutes, without the manager in the room, gets honest answers.

03 — Code it, then act on it
A reason only helps when it is counted by branch, role and manager, and someone owns the action.
