CLIENT CASE STUDY · LIGHTING & ELECTRICAL DISTRIBUTION · SALES & PROJECTS

UAE CONSTRUCTION PROJECTS · GENAI PROGRAMME USE CASE

Pipeline & Tender Intelligence

Sales and projects leaders built their own pipeline radar in HMC's GenAI programme: every live project on one map, a bid optimiser that finds the discount sweet spot, and a GenAI tender brief that turns an enquiry into a bid plan.

~~24%~~ → **31%** tender win rate after the use case

140 projects
Live projects on the radar
7 emirates · 7 segments

31 %
Tender win rate
▲ from 24% before

3.5 pts lower
Average discount on won bids
price where it wins, not everywhere

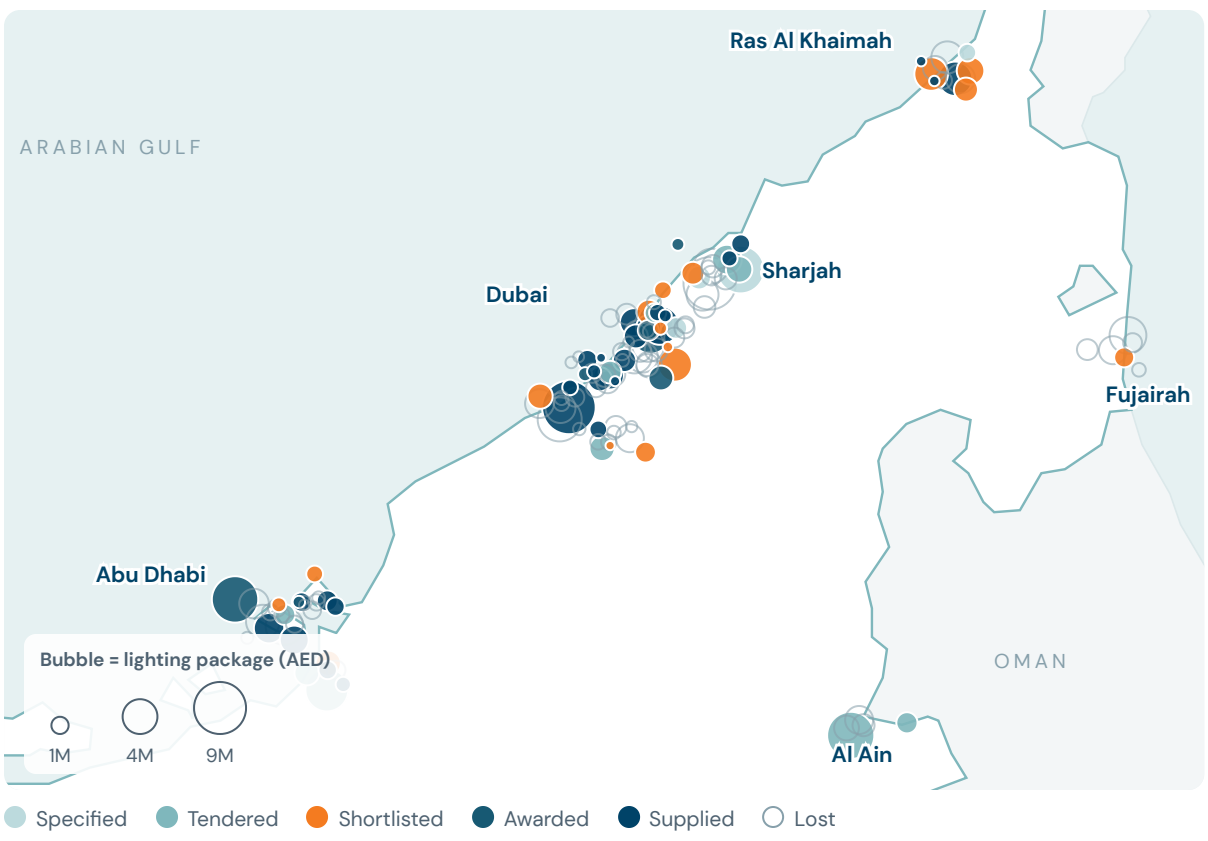

2 hours
Time to a tender brief
from about two days

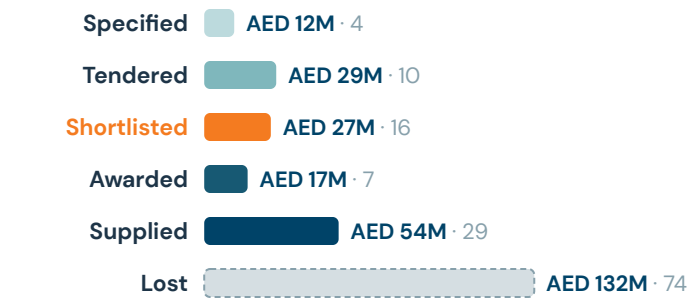

Rings: the 140 projects by stage at year end (shortlisted in orange); win rate with the earlier 24% inside; six segments, all with a lower median discount on won bids; the brief's four steps (read, retrieve, score, draft).

01 Every live project, on one map

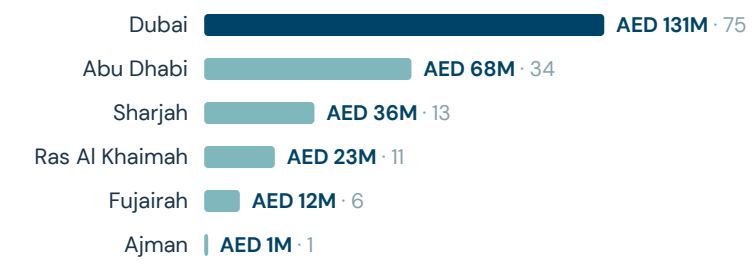

Pipeline radar at year end · synthetic projects, locations approximate

LIGHTING VALUE BY STAGE · PIPELINE BOARD

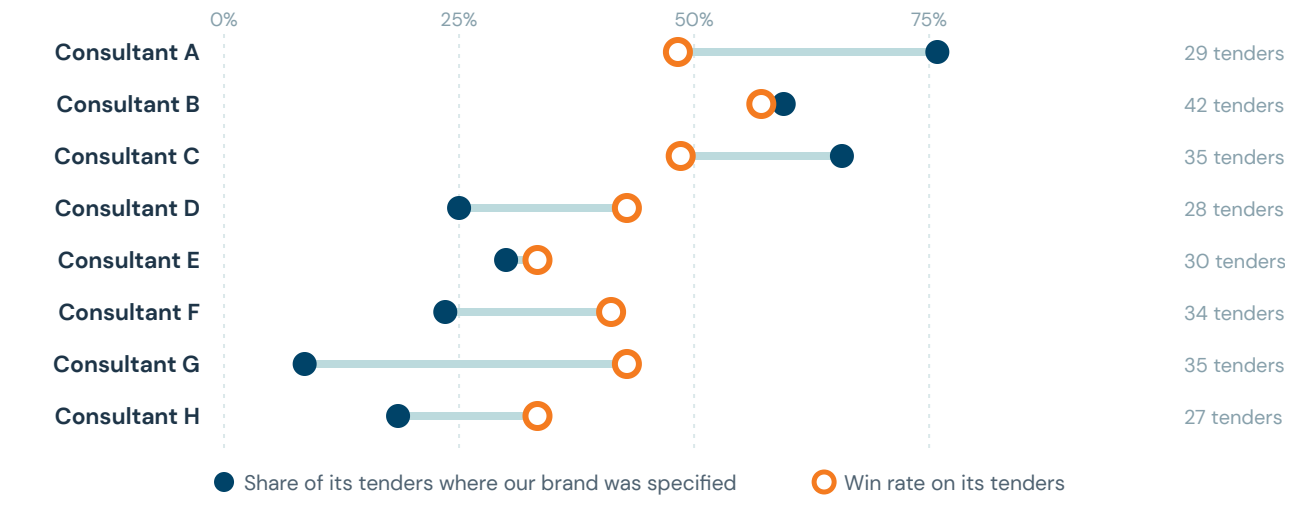

LIGHTING VALUE BY EMIRATE

WHERE TO FOCUS MONDAY
16 shortlisted projects worth about AED 27M are still open to win: the board puts them in front of the weekly review instead of in individual spreadsheets.

02 The win is decided at specification

260 past tenders behind the bid model · synthetic

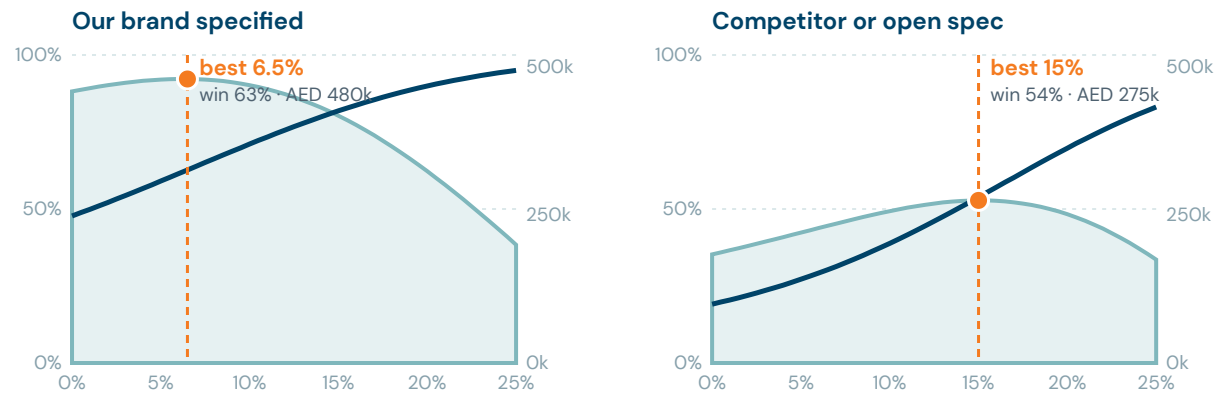

BRAND SPECIFIED
56%
won · 57 of 102 tenders

NOT SPECIFIED
37%
won · 58 of 158 tenders

Consultants A–C specify the brand on most of their tenders and carry the highest win rates. **Being written into the consultant's spec moves win probability more than any discount**, so effort moved upstream to consultant engagement plans.

03 Price to expected margin, not to habit

Bid optimiser · logistic model on past tenders · office, AED 3M package

GENAI TENDER BRIEF · RECOMMENDED PRICE

Read enquiry → retrieve comparables → score → draft. Six points deeper wins more often but earns less.

Mixed-use tower, Business Bay — AED 6.8M · specified
RECOMMENDED **6.5%** win 63% · AED 1,087k
6 PTS DEEPER **12.5%** win 77% · AED 1,018k

Hospital extension, Al Ain — AED 4.2M · not specified
RECOMMENDED **16.5%** win 52% · AED 337k
6 PTS DEEPER **22.5%** win 72% · AED 286k

Logistics hub, Dubai South — AED 2.1M · not specified
RECOMMENDED **16.5%** win 51% · AED 166k
6 PTS DEEPER **22.5%** win 71% · AED 142k

Win probability (left axis) · Expected gross profit, AED (right axis) · Discount that maximises expected profit · Brief figures: win probability · expected gross profit

04 Four pain points, four fixes

Before → after

BEFORE
Pipeline in many heads
Project leads sat with individual salespeople and spreadsheets, with no single view across emirates.

PIPELINE RADAR

AFTER
One map and board
All emirates on one screen; weekly review moves from status updates to decisions on focus.

BEFORE
Specification blind spots
Which consultants specify the brand, and where competitors are written in, was not tracked.

CONSULTANT TRACKING

AFTER
Tracked from the start
Specification followed by consultant, not discovered at tender.

BEFORE
Discounting by habit
Deep discounts were given to win, even where specification meant the order was likely anyway.

BID OPTIMISER

AFTER
Priced on evidence
Discount set from win probability and margin; every bid feeds the model.

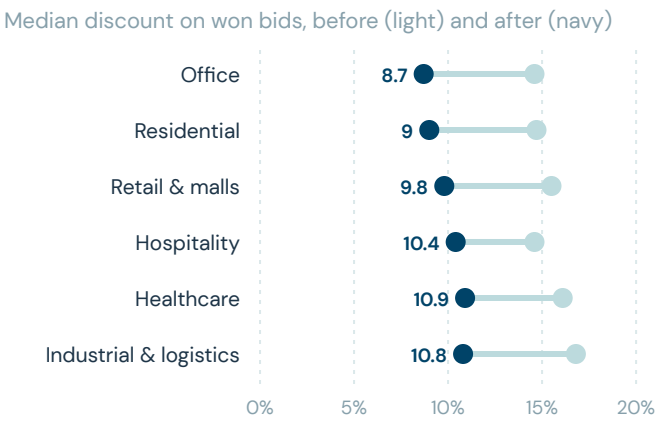

BEFORE
Slow tender preparation
Reading tender packs and finding comparable past bids took about two days per enquiry.

GENAI TENDER BRIEF

AFTER
Brief in about two hours
Drafted with comparable bids before the bid meeting.

05 Discounts tightened

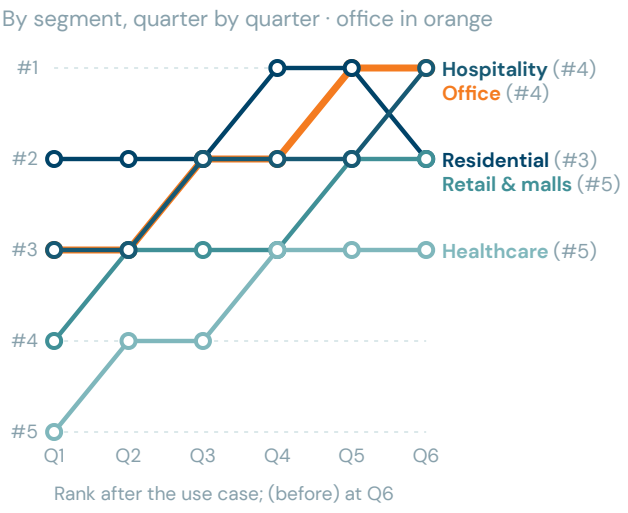

Median discount on won bids, before (light) and after (navy)

3.5 pts lower average discount on won bids: price where it wins, not everywhere

06 Rank among suppliers

By segment, quarter by quarter · office in orange

Rank after the use case; (before) at Q6

07 How HMC ran it

1 Workshop — **Discover**
Leaders mapped who specifies, buys and approves. Win-loss hypotheses.

2 Workshop — **Design**
Project stages, win probability logic, brief template. Data model and prompts.

3 Hackathon — **Build**
Map, board, optimiser and brief with GenAI-assisted coding. Working prototype.

4 Weekly — **Adopt**
One screen for the Monday pipeline review; big bids run through the optimiser.

5 Roadmap — **Scale**
Consultant plans, win-loss reasons on every tender, CRM and ERP links.

What any projects business can borrow

01 Win at specification
Being written into the consultant's spec moves win probability more than any discount.

02 Price to expected margin
The best discount maximises win probability times margin, and it is rarely the deepest one.

03 Let leaders build
A tool built by the people who sell gets used in Monday's review.

Built with **GenAI assistants** · **GenAI-assisted coding** · **Logistic regression** · **Excel** | Prepared by Havish M Consulting · Figures indicative; validated metrics available on request. Charts use synthetic projects and tenders.
