Rewire the Organisation

One Excel goes in; a living org chart comes out, with spans and layers X-rayed, reorganisations rehearsed on screen and succession gaps flagged before they bite.

~~34~~ → 1 org charts in circulation: decks to one Excel

1 day
Org chart refresh cycle
▼ from about 3 weeks of PPT edits

14 per review
Reorg scenarios tested before go-live
▲ from 1–2 drawn by hand

−54 %
Managers with fewer than 3 reports
▼ from 26 to 12 after delayering

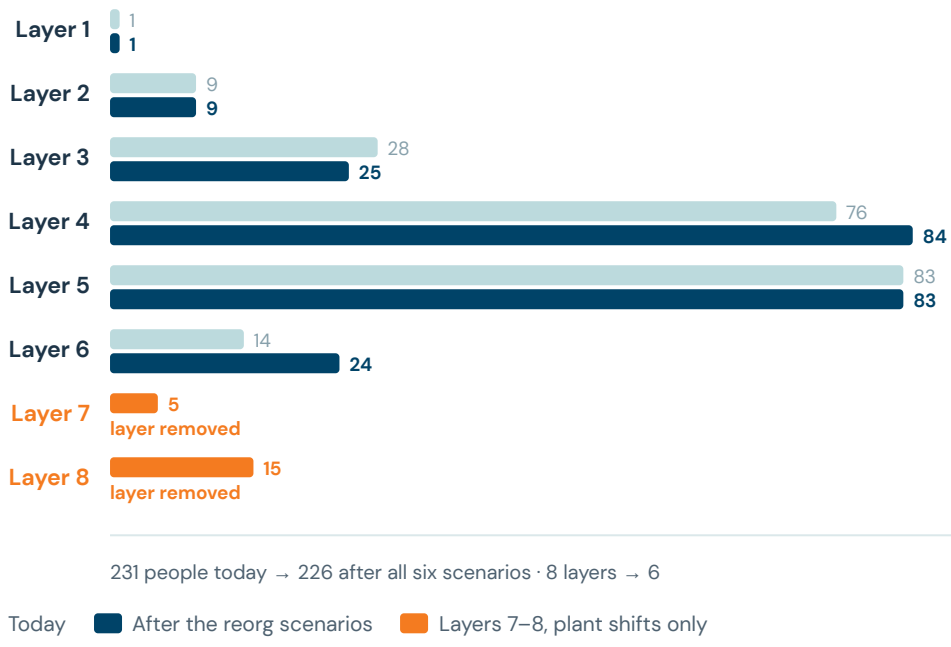

68 %
Critical roles with a ready-now successor
▲ from 41% before the talent review

Rings: 1 day against a 3-week (21-day) cycle; one segment per scenario; narrow-span managers left (12) against the original 26; ready-now cover with the earlier 41% inside. Figures indicative; validated metrics available on request.

01 The X-ray: layers nobody chose

Illustrative org model from the Org Studio demo · today vs all six scenarios applied

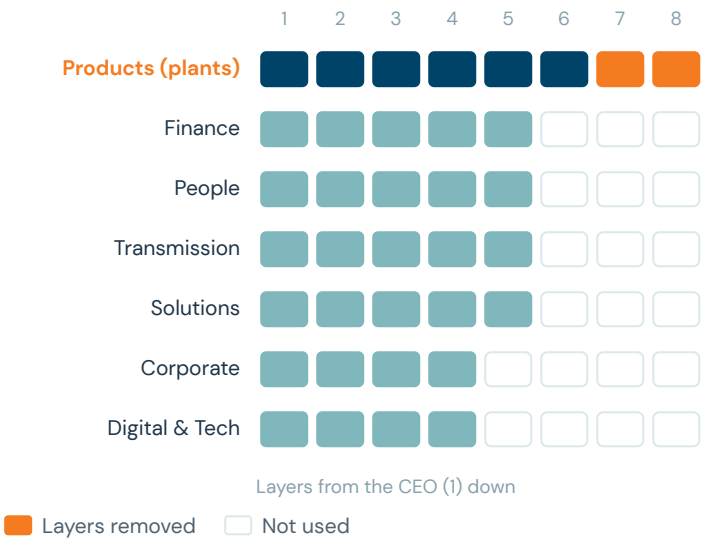

PEOPLE IN EACH LAYER BELOW THE CEO

231 people today → 226 after all six scenarios · 8 layers → 6

Today · After the reorg scenarios · Layers 7–8, plant shifts only

HOW DEEP EACH BUSINESS RUNS

FOUND
Eight layers in the plants
Some plant teams sat eight layers below the CEO; every other business stopped at four or five.

FOUND
A third of managers too thin
26 of 78 people managers had one or two reports. Nobody could see it, so nobody fixed it.

RULE AGREED
Span health, defined once
Under 3 reports is narrow, 3 to 10 healthy, above 10 wide: coloured live on the chart.

02 Six reorgs rehearsed before anyone announced one

Reorg sandbox · each scenario run alone against today's organisation

Delayer the plants
Deputy plant head layer removed; production managers report to plant heads.
LAYERS 8 → 7 · NARROW SPANS 26 → 24 · MANAGERS 78 → 76

One commercial team
Products and Solutions sales merged under one VP, Commercial.
LAYERS 8 → 8 · NARROW SPANS 26 → 25 · MANAGERS 78 → 77

One projects organisation
North and South & West project VPs combined into one VP, Projects.
LAYERS 8 → 8 · NARROW SPANS 26 → 24 · MANAGERS 78 → 77

Fold treasury into controllership
The VP, Treasury role, with a single report, merges into controllership.
LAYERS 8 → 8 · NARROW SPANS 26 → 26 · MANAGERS 78 → 77

Digital & analytics CoE
Three BU analytics leads move into one CoE under the CDTO.
LAYERS 8 → 8 · NARROW SPANS 26 → 26 · MANAGERS 78 → 78

Thin teams become expert roles
Managers below L3 with one or two reports become senior specialists.
LAYERS 8 → 6 · NARROW SPANS 26 → 14 · MANAGERS 78 → 68

ALL SIX TOGETHER
8 → 6 layers · 78 → 65 people managers · 2.95 → 3.46 average span · 26 → 12 narrow spans · ₹78.4 → 70.9 Cr management cost

Management cost uses illustrative grade-based CTC; people, roles and figures in the demo organisation are synthetic.

03 Which critical roles would leave a hole tomorrow?

Bench view · 37 leadership roles, by business

Transmission (5 → 6 of 6)	Products (0 → 3 of 5)	Solutions (2 → 2 of 4)	Finance (1 → 3 of 4)	People (3 → 3 of 6)	Digital & Tech (0 → 1 of 4)	Corporate (4 → 7 of 8)
CEO, Transmission Infrastructure	CEO, Products (Conductors, Cables & OPGW)	**Business Head, Solutions (Upgrade & EPC)**	**Chief Financial Officer**	**Chief Human Resources Officer**	Chief Digital & Technology Officer	**Chief Strategy Officer**
VP, Business Development	VP, Manufacturing	VP, Sales – Solutions	VP, Controllership	VP, Talent & Leadership	Head, Enterprise Applications	Head, Corporate Strategy
VP, Projects – North	VP, Sales – Products	VP, Execution	VP, Treasury & Investor Relations	Head, Rewards & HR Operations	Head, Infrastructure & Cyber Security	**General Counsel & Company Secretary**
VP, Projects – South & West	VP, Supply Chain	Head, Solutions Engineering	Head, Business Finance	HRBP Lead, Transmission	Head, Data & Analytics	Head, Contracts & Disputes
Head, Asset Management & O&M	Head, R&D and Product Development			HRBP Lead, Products		Company Secretary
Head, Engineering & Design				HRBP Lead, Solutions		**Head, Health, Safety & Environment**
						HSE Lead, Projects
						HSE Lead, Plants

READY-NOW COVER
41% → 68%
Share of critical roles with at least one ready-now successor, before and after the quarterly talent review.
Covered before the review · Cover added in the review · Still no ready-now successor
Bold tiles report to the CEO. Role titles only; readiness scores in the demo are synthetic.

04 Four pain points, four fixes

Before → after

BEFORE
Charts as slides
Thirty-four PowerPoint org charts, each drawn by hand and out of date within weeks.
ONE EXCEL TEMPLATE
AFTER
Living org chart
HRBPs maintain one sheet; the chart rebuilds the day it is uploaded.

BEFORE
Layers nobody chose
Spans and layers unknown until a consultant counted them.
SPANS & LAYERS X-RAY
AFTER
Narrow spans flagged
X-rayed live; the first delayering round merged one- and two-report teams.

BEFORE
Reorgs on a whiteboard
One option, late, with no view of cost, layers or people affected.
REORG SANDBOX
AFTER
Options, not debates
Several scenarios rehearsed with cost and layer impact; each proposal arrives with one attached.

BEFORE
Succession in a drawer
A separate file, rarely opened; a resignation exposed no ready-now cover.
BENCH VIEW
AFTER
Bench next to the chart
Reviewed each quarter; plain-English questions answered on the chart.

05 Span of control

Managers by direct reports, before (light) and after (navy)

Avg span 2.95 → 3.46 · narrow 26 → 12

06 HR hours back

Hours a month by task, before → with Org Studio

154 → 24 HR hours a month
130 hours back

07 How HMC ran it

2 weeks — Discover
34 chart versions found; a fifth had conflicting reporting lines. Privacy rules agreed.

2 weeks — Design
One row per person, span-health rules, critical-role and readiness columns.

4 weeks — Build
Org Studio as a single HTML file, with Claude as the coding partner.

1 quarter — Adopt
HRBPs own their BU tab; talent review runs on the bench view.

∞ ongoing — Scale
Daily HRMS feed, role-based views, cost and diversity lenses.

What any HR team can borrow

01
One sheet beats thirty-four decks
When the org chart is generated from data HR already owns, it stays current without anyone redrawing a box.

02
Spans and layers are design choices
Once narrow spans and deep layers were visible, leaders fixed them in a quarter. They had simply never seen them.

03
Rehearse the reorg on screen
Seeing the layers, cost and people affected before the announcement turned reorg debates into choices between options.

Built with **Excel** · **Claude** · **D3.js** · **SheetJS** · **HRMS export** · single HTML file | Prepared by Havish M Consulting · Figures indicative; validated metrics available on request.
